Subject: Exide meeting
Date: Tuesday, June 25, 2013 7:35:59 PM

The Exide meeting was fine. Jim plus 7 Frisco residents. Concerns basically what we have heard before - public participation, the fact that Exide is doing the investigation, small amount of financial assurance under the permit and the fate of the bow tie parcel. They do seem to have a vision and discussed the Midvale, Utah cleanup and redevelopment as a model. We will do some research on that facility.

Good discussion on RCRA vs CERCLA and Jim seemed satisfied and appreciative of our participation. At the end I recommended that TCEQ and the city be part of our discussions so they get all the info they need and can express their vision directly to the city.

I will probably be in at 9 tomorrow so I wanted you to have this before SS. If you have questions in the am please call my cell.
